The MediaCentral | UX mobile app does not support connecting to a MediaCentral | Cloud UX system.

MediaCentral v2.4.0 does not have an accompanying mobile client.

a. Darkened fields indicate legacy information for releases that are no longer supported. For more information on End of Support (EOS) dates, see the following Avid Knowledge Base article:

http://avid.force.com/pkb/articles/en_US/faq/End-of-support-dates

b. The MediaCentral UX Mobile app v2.10 supports connection to servers running MediaCentral Platform Services v2.10, and prior releases listed above. However, sites that have upgraded the servers to v2.10 **must** upgrade the mobile client to v2.10.

(1) Jupiter AccuSwitch mode software versions older than v7.9.1 on the CM-4000/CM-4400 are known to not work with the Router Control Jupiter plug-in. Jupiter Express mode has only been tested with v7.9.1. Other versions of Jupiter software have not been tested with the CM-4000/CM-4400. Note that the VM-3000 is no longer supported, because it will not work with GV v7.9.1 and later.

(2) Jupiter AccuSwitch v7.9.1 is the last supported release for CM-4000 and CM-4400.

Protocol Translators (Emulators) are not supported

Note that Protocol Translators (Emulators) are not supported. The Tested Controller Software column lists the versions of the controller software that have been tested in the QA lab and have been demonstrated to be compatible with Router Control v3.7 and later. Other versions of controller software may work, unless otherwise noted, though they have not been specifically tested in the lab.
