

Avid Sibelius Comparison Guide

This table identifies differences in features and functionality between the three tiers of Sibelius on macOS and Windows: Sibelius First, Sibelius Artist, and Sibelius Ultimate.

Features that are not currently available on iPad are called out in **bold**.

Sibelius First A great introduction to working with the Sibelius software line. It supports up to four staves in a score and provides sufficient capabilities for most of your basic music notation needs. If you need more fully featured functionality, you can upgrade to Sibelius Artist or Sibelius Ultimate anytime through your Avid Master Account.

Sibelius Artist Great for students and skilled amateurs. It supports up to 16 staves and provides all the tools you need to create professional looking scores for music of moderate complexity.

Sibelius Ultimate A must for professionals and educators. It lets you create as many staves as the music demands, and it is extensively customizable, so you can make even the most complex music look perfect.

General	Sibelius First	Sibelius Artist	Sibelius Ultimate
Lets you...	Create simple scores with up to 4 staves—can open scores with more than 4 staves for review, but are read only	Create professional-quality scores and compose simple to moderate music—up to 16 staves; and can open scores with more than 16 staves for review, but they are read only	Compose, arrange, and publish professional-quality scores and parts of any size and complexity with as many staves as you need; create notation worksheets and exercises for education; and more

Video file (Export score as) (not available on iPad)	No	Yes	

Keypad in Sibelius First, Sibelius Artist, and Sibelius Ultimate

Sibelius First, Sibelius Artist, and Sibelius Ultimate each provide six Keypad layouts: Common notes (F7), More notes (F8), Beams/Tremolos (F9), Articulation (F10), Jazz articulations (F11), and Accidentals (F12). However, not all options available with Sibelius Ultimate are available with Sibelius Artist and Sibelius First.

The Keypad also lets you select which voice in a staff you want to add or edit notes. While Sibelius Artist and Sibelius Ultimate let you work with up to four voices on a staff, you are limited to two voices with Sibelius First.

Sibelius First, Sibelius Artist, and Sibelius Ultimate and the Ribbon

The contents of the Ribbon differ between Sibelius First, Sibelius Artist, and Sibelius Ultimate. For instance, the Parts tab is only available in Sibelius Ultimate. Similarly, Sibelius First and Sibelius Artist provide fewer options in each tab than Sibelius Ultimate.

On iPad, supported Ribbon commands are accessible using Command Search.
