Issues Fixed in Sibelius 2024.3.1

Sibelius 2024.3.1 on Windows and Mac fixes the following issues:

- Tied-to notes are updated when changing enharmonic spelling of the first note in a tie chain.
- Print margins are now again correct when printing.
- When using the search boxes in the Add/Remove Instruments and Instrument Changes windows, you are no longer taken to the wrong instrument when pressing Return.
- To help newer plug-ins run on older versions of Sibelius in the future, the “InterpreterOptionExists” call is now wrapped inside the version check.
