1 Introduction

New Features and Improvements in Sibelius 2026.2

Sibelius 2026.2 provides the following new features, changes, and improvements:

- [Dark Color Theme Option](#)
- [Textures Preferences Moved to the Appearance Preferences](#)
- [Cross-Staff Beaming Improvements](#)
- [Double Note Values for Whole Notes and Longer Durations Engraving Rule](#)

System Requirements and Compatibility Information

Avid® can only assure compatibility and provide support for hardware and software it has tested and approved.

Avid lets you install an endpoint detection and response solution on your Sibelius client. While Avid does not support any specific solution, you can find general guidelines and information related to CrowdStrike Falcon on the following Avid Knowledge Base page:

https://kb.avid.com/articles/en_US/troubleshooting/en239659

For complete system requirements and a list of qualified computers, operating systems, hard drives, and third-party devices, visit:

www.avid.com/compatibility

Conventions Used in Sibelius Documentation

Sibelius documentation uses the following conventions to indicate menu choices, keyboard commands, and mouse commands:

Convention	Action
File > Save	Choose Save from the File tab
Control+N	Hold down the Control key and press the N key
Control-click	Hold down the Control key and click the mouse button
Right-click	Click with the right mouse button

The names of **Commands**, **Options**, and **Settings** that appear on-screen are in a different font.

The following symbols are used to highlight important information:

User Tips are helpful hints for getting the most from Sibelius.

Important Notices include information that could affect data or the performance of Sibelius.

Shortcuts show you useful keyboard or mouse shortcuts.

Cross References point to related sections in this guide and other Avid documentation.

Resources

The Avid website (www.avid.com) is your best online source for information to help you get the most out of Sibelius.

Account Activation

Create an Avid Master Account at:

- ▶ <https://my.avid.com/account>

Product Registration

Register your purchase online at:

- ▶ www.avid.com/register

Product Downloads

Download software, updates, documentation, and other resources from:

- ▶ my.avid.com/products

Support and Downloads

Contact Avid Customer Success (technical support), download software updates and the latest online manuals, browse the Compatibility documents for system requirements, search the online Knowledge Base or join the worldwide Avid user community on the User Conference.

2 New Features and Improvements in Sibelius 2026.2

Dark Color Theme Option

Sibelius lets you switch between **Light** and **Dark** color theme appearance options. With **Light** enabled, Sibelius appears with a light user interface and updated graphics for icons. With **Dark** enabled, Sibelius presents a darkened user interface. This may be preferable when you are working in a low light environment.

 Additionally, the Textures preferences have been moved to the Appearance Preferences page.

To set the appearance for Sibelius to either the Light or Dark theme:

1. Choose **File > Preferences > Appearance**.
2. Select either the **Light** or **Dark** for the **Color Theme** as desired.

3. Click **OK**.

The following images provide a few examples of the Dark theme:

Home tab, Dark theme

Keypad, Dark theme

Flexi-time Options dialog, Dark theme

Textures Preferences Moved to the Appearance Preferences

The **Textures** preferences have been moved to the **Appearance** preferences page. Additionally, you can now click the **Restore Defaults** button to restore the default Textures settings.

Cross-Staff Beaming Improvements

Sibelius provides improved handling of cross-staff beaming and rests. Enable the **Avoid cross-staff beam corners by placing primary beam on the side of the first note** option to avoid unwanted beam corners. Enable the **Hide Bar Rests** option to automatically hide rests on staves bridged by beams.

To enable the option for improved cross-staff beaming:

1. Choose **Appearance > Engraving Rules > Beams and Stems**.
2. Under **Beam Positions**, select the **Avoid cross-staff beam corners by placing primary beam on the side of the first note** option to avoid unwanted beam corners.

3. Choose **Engraving Rules > Bar Rests** and under **Cross-staff passages**, enable **Hide Bar Rests** to automatically hide rests on staves bridged by beams.

4. Click **OK**.

The following images show an example of cross-staff beaming with this option disabled and enabled:

Avoid cross-staff beam corners by placing primary beam on the side of the first note option disabled

Avoid cross-staff beam corners by placing primary beam on the side of the first note and Hide bar rests options enabled

Double Note Values for Whole Notes and Longer Durations Engraving Rule

A new engraving rule changes the legacy behavior for two-note tremolos within Sibelius. This option is disabled for old scores (to preserve this legacy behavior), but enabled for new scores. When enabled, double tremolos on whole notes and double whole notes appear with doubled note values.

1. Choose **Appearance > Notes and Tremolos**.
2. Enable **Double note values for whole notes and longer durations**.

Two-Note Tremolos

☐ Touching stems
☐ Outer tremolo touching stems
☒ Between stems
☒ Double note values for whole notes and longer durations

3. Click **OK**.
