Revision History

Date	Description
October 20, 2020	Updated Fixed in Media Composer v2018.12.13

(Windows) Installing the Editing Application

⚠ **IMPORTANT (Windows) Both a full installer and a patch installer are provided for Media Composer v2018.12.13.**
To use the patch, you must have v2018.12.3 already installed. Then use the 2018.12.13 patch to update to v2018.12.13.

Documentation Note

The Media Composer editing guide and Media Composer help stated that the maximum number of characters for Tape Names is 32. The actual maximum is 31 characters.

Known Limitation

The following is a known limitation:

- MCCET-3573. Cross-rate linked media that was created in Media Composer v2019.x is not compatible with Media Composer versions 2018.12.x and earlier. Attempting to use cross-rate linked media from Media Composer v2019.x might result in errors.

Fixed in Media Composer v2018.12.13

The following have been fixed:

➤ **Bug Number:** MCCET-3357. You could not successfully playback Capture in progress files coming from MOG.

➤ **Bug Number:** MCCET-3780. (macOS) You might have received an "Exception path does not exist" error when saving a Script file to Avid NEXIS.

➤ **Bug Number:** MCCET-3569. (Artist Mix) Audio Mixing using Live Mode did not work when performing an audio punch-in.

➤ **Bug Number:** MCCET-3207. The text "%20" replaced spaces in UNC and NAS paths in the Source Browser.

➤ **Bug Number:** MCCET-3533. You could not successfully update your sequence after editing group clips.

➤ **Bug Number:** MCCET-3805. When in Frame View, thumbnails did not always matching the clip and might have changed once selected.

➤ **Bug Number:** MCCET-3267. In some instances, when performing a render operation, a low disk space warning is raised multiple times instead of once.

➤ **Bug Number:** MCCET-3680. Timecode Burn-in effect did not always show Clip Notes.

➤ **Bug Number:** MCCET-3610. In some instances, double clicking assets from Production Management Window could result in a hang or crash.

➤ **Bug Number:** MCCET-3749. Media Composer might have crashed when browsing folders in the Production Management Window that contain an asset that has 32000 characters in the comment field.

➤ **Bug Number:** MCCET-2665. With an Avid Artist DNxIO or DNxIQ attached, you could not playback a sequence in the Timeline if calibration tone was playing.

➤ **Bug Number:** MCCET-3790. Export AAF with OMF (Wave) media did not include iXML metadata.

➤ **Bug Number:** MCCET-3454. There was no timecode information in V1 TC1 after performing an Autosync of a mixdown and tone.

➤ **Bug Number:** MCCET-3347. Desktop Video Setup for Artist DNxIQ did not retain audio output level.

➤ **Bug Number:** MCCET-3655. Linking Vantage created MXF media crashed Media Composer with XDCAM HD 50Mbits (1080i/60) project.

➤ **Bug Number:** MCCET-3454. Exporting HDCAM SR linked media was much slower to Avid NEXIS than to a local drive. You must have HDCAM SR plug-in v4.5.6 installed to see this fix.

➤ **Bug Number:** MCCET-3387. AAF exports with mixed sample rates did not include Time Compression or Pitch Shift effects.
