

Avid Editing Application

ReadMe

Revision History

Date	Description
September 10, 2019	Added Mac OS v10.14.6 support info to Changed in Media Composer v2018.12.7 .

(Windows) Installing the Editing Application

IMPORTANT (Windows) Both a full installer and a patch installer are provided for Media Composer v2018.12.7.

To use the patch, you must have v2018.12.3 already installed. Then use the 2018.12.7 patch to update to v2018.12.7.

Changed in Media Composer v2018.12.7

The following has changed with Media Composer v2018.12.7

Mac OS Support

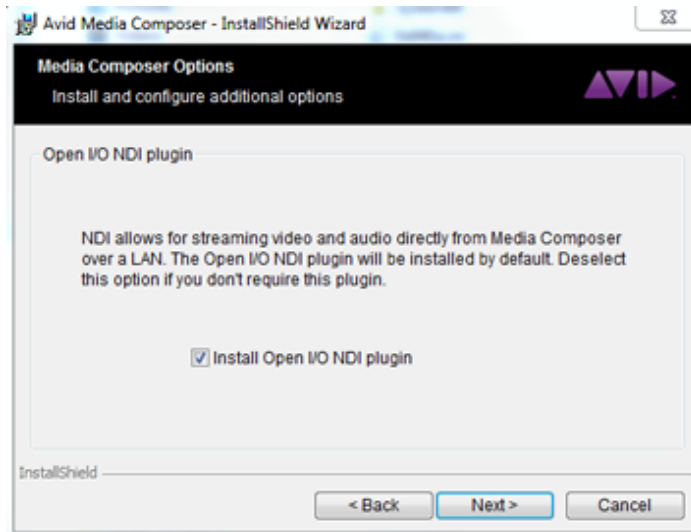

This release has added support for Mac OS v10.14.6.

Simplified Installer

A change has been made to the Installer to remove an install menu window. When you download Media Composer v2018.12.7, simply double-click Install Media Composer.exe to install Media Composer.

Open I/O NDI Plug-In

In previous releases, the Open NDI Plug-In was automatically installed when you installed Media Composer. With this release, you have the option to install or not during the install process. For details on this plug-in, see “Support for NewTek NDI Video over IP” in the Help.

Fixed in Media Composer v2018.12.7

The following have been fixed:

- **Bug Number:** MCCET-3004. In the previous release, you could not use the patch installer if you were using a non-English locale.
- **Bug Number:** MCCET-3041. If you pressed ESC a few seconds after performing a trim, the Timeline did not update correctly.
- **Bug Number:** MCCET-2986. In some instances, adjusting audio level from the Audio Mixer, while playing a sequence, did not affect the volume.
- **Bug Number:** MCCET-3031. In some instances, when I/O hardware was enabled, you could not import/transcode to AVCIntra50.
- **Bug Number:** MCCET-2899. All related media object were not highlighted when selecting media relatives if you grouped clips and selected Select Sync Clips Using “Film TC/Sound TC”.

- **Bug Number:** MCCET-3026. When consolidating a subclip with “Delete original media files when done” enabled, an unrelated Transcode notification message was displayed.
- **Bug Number:** MCCET-3003. You could not rename group clip tracks.
- **Bug Number:** MCCET-3016. Audio meters did not display in the Audio Tool, Audio Mixer or Timeline window during a Digital Cut.
- **Bug Number:** MCCET-3073. AAF exports did not include the media if the clip was muted.
- **Bug Number:** MCCET-3086. You could not copy and paste markers using Ctrl + C and Ctrl + V.
- **Bug Number:** MCCET-3059. You could not save newly created and renamed shared bins in project sub folders.
- **Bug Number:** MCCET-2905. Using the arrow up and arrow down keys to move clips from one track to another did not work when a nested effect was open.
- **Bug Number:** MCCET-2954. When working with a single monitor, if you saved a title using the Title Tool application, then closed and reopened the bin, you could not select anything in the bin.
- **Bug Number:** MCCET-2992. The Stop and Pause buttons did not work if you used them from the Active Palette option of the Command Palette or if you mapped them.
- **Bug Number:** MCCET-3063. You might have received an “Exception” error when trying to link and playback Telestream files in MXF OP-1A ProRes HD format.
- **Bug Number:** MCCET-2995. In some instances, scrubbing and playing back with JKL resulted in slow-motion playback and/or playback not stopping when you pressed the K key.
- **Bug Number:** MCCET-2779. When GPU effects are enabled in Render Settings, you might see jitter on video mixdowns.
- **Bug Number:** MCCET-2873. In some instances, if I/O hardware was enabled, Media Composer would vaporize if the Source/Record monitor video was hidden.
- **Bug Number:** MCCET-3096. Adding an animated scale to a title text created with Avid Titler + resulted in jittery text.
- **Bug Number:** MCCET-3098. You might have received a “failed to import” message when trying to import exported AAF media.

- **Bug Number:** MCCET-3094. If Audio scrubbing is enabled, you might receive an “Assertion Failed” error when trimming compressed stereo MP2 audio clips.
- **Bug Number:** MCCET-2951. You might have received an “Assertion failed: widget” error after clicking the Audio Monitor Control button and adjusting audio.
- **Bug Number:** MCCET-3087. In some instances, the editing application would crash when rendering audio effects on a long audio clip.
- **Bug Number:** MCCET-3134. In some instances, after opening and closing the Audio Punch-in Tool, some text is missing from the window.
- **Bug Number:** MCCET-3018. Importing .scc files toggled the input/output signal on the Avid Artist DNxIO.
- **Bug Number:** MCCET-2990. Logging out of Production Management was slow.
- **Bug Number:** MCCET-2981. In some instances, clicking the Stop button on the Audio Punch-In tool only worked intermittently.
- **Bug Number:** MCCET-3084. In some instances, saving a new Export setting did not work if the setting was created during an Export process.
- **Bug Number:** MCCET-2987. Markers in tracks that only had filler and no edits ignored sync lock when the track was selected during trim.
- **Bug Number:** MCCET-3145. The editing application might have crashed or resulted in an “Out of memory” error when trying to load an archived sequence.
- **Bug Number:** MCCET-3022. In some instances, even after deleting a sequence related MXF OP-Atom media file, the sequence would relink to the linked video clip.
