

# Avid® Editing Application

## ReadMe for Media Composer® v2019.11

---

### Revision History

Date	Description
March 6, 2020	Updated Feature Performance to remove outdated recommended systems.
December 19, 2019	Added MCCET-3217 to <a href="#">Fixed in Media Composer v2019.11</a> .
November 21, 2019	Updated <a href="#">Qualified Hardware and Operating Systems</a> to add note that Windows 10 v1909 is not currently supported.
November 18, 2019	Updated <a href="#">Limitations</a> .

**IMPORTANT: Avid periodically makes software updates available for download on Avid.com at the following location:**[www.avid.com/us/support/downloads](http://www.avid.com/us/support/downloads). Please check the above site regularly for information on available downloads for your product.

### Important Information

Avid® recommends that you read all the information in this ReadMe file thoroughly before installing or using any new software release.

**Important:** Search the Avid Knowledge Base for the most up-to-date ReadMe file, which contains the latest information that might have become available after the documentation was published.

This document describes compatibility issues with previous releases, software installation instructions, hardware and software requirements, and summary information on system and memory requirements. This document also lists hardware and software limitations.

# Symbols and Conventions

Avid documentation uses the following symbols and conventions:

Symbol or Convention	Meaning or Action
	A note provides important related information, reminders, recommendations, and strong suggestions.
	A caution means that a specific action you take could cause harm to your computer or cause you to lose data.
	A warning describes an action that could cause you physical harm. Follow the guidelines in this document or on the unit itself when handling electrical equipment.
	A user tip provides a helpful hint that can aid users in getting the most from their system.

---

**Symbol or Convention**   **Meaning or Action**

---

	A shortcut shows the user keyboard or mouse shortcuts for a procedure or command.
>	This symbol indicates menu commands (and subcommands) in the order you select them. For example, File > Import means to open the File menu and then select the Import command.
▶	This symbol indicates a single-step procedure. Multiple arrows in a list indicate that you perform one of the actions listed.
(Windows), (Windows only), (macOS), or (macOS only)	This text indicates that the information applies only to the specified operating system, either Windows or macOS.
<b>Bold font</b>	Bold font is primarily used in task instructions to identify user interface items and keyboard sequences.
<i>Italic font</i>	Italic font is used to emphasize certain words and to indicate variables.
<b>Courier Bold font</b>	Courier Bold font identifies text that you type.
Ctrl+key or mouse action	Press and hold the first key while you press the last key or perform the mouse action. For example, Command+Option+C or Ctrl+drag.
(pipe character)	The pipe character is used in some Avid product names, such as MediaCentral   Production Management. In this document, the pipe is used in product names when they are in headings or at their first use in text.

---

## If You Need Help

If you are having trouble using your Avid product:

1. Retry the action, carefully following the instructions given for that task in this guide. It is especially important to check each step of your workflow.
2. Check this ReadMe file for the latest information that might have become available after the documentation was published. Also check online for the most up-to-date ReadMe because the online version is updated whenever new information becomes available. To view the online ReadMe, select ReadMe from the Help menu, or visit the Knowledge Base at <http://www.avid.com/readme>.
3. Check the documentation that came with your Avid application or your hardware for maintenance or hardware-related issues. In addition to the printed documentation supplied with your editing application, the documentation is supplied in PDF format when you install the application. Topics that you print from the Help have limited page layout and formatting features. If you want to print a higher quality version of Help information, Avid recommends

that you print all or part of the PDF version of the appropriate Avid manual included in the Online Library for your editing application. To access the Online Library, select Help > Online Library from within your Avid editing application.

4. Visit Avid Online Support at [www.avid.com/onlineSupport/](http://www.avid.com/onlineSupport/). Online support is available 24 hours per day, 7 days per week. Search the Knowledge Base to find answers, to view error messages, to access troubleshooting tips, to download updates, and to read or join online message-board discussions.

## Media Composer Notes

*(Windows) If you are installing the editing application and you have a previous version of the editor on your system, go to the Control Panel and manually uninstall the editing application before you try and install v2019.11.*

**Media Composer v2019.11 is not supported with Media Composer | Cloud Remote.**

**MCDEV-11537 If you intend to use full-frame stereoscopic with an Avid Artist DNxIQ, you may want to remain with Media Composer v2018.12.x until the issues with Stereoscopic support are resolved in a future version.**

**(Mac) You might receive an “Is not optimized for your Mac” message while launching Media Composer for the first time on a Mac OS 10.14.x system. Press OK to continue.**

- (MCCET- 2541) When working with Avid Artist DNxIO or Avid Artist DNxIQ, you should disable the Line In recording input (BlackMagic Audio in the Windows OS).
- Avid recommends that you **do not** install Desktop Video software version 10.10.1 on Media Composer versions prior to v2018.5.1.
- **Avid Artist DNxIO and Avid Artist DNxIQ:** If you are using Avid Artist DNxIO, Avid Artist DNxIQ, or a BlackMagic Designs video device, please update to Desktop Video software version v11.0 or higher. If you are using Avid Artist DNxIV and Avid Artist DNxIP please update to AJA software v15.2 or later.
- **Qualified Operating Systems:** For information on qualified operating systems, see [Qualified Hardware and Operating Systems](#).
- **Dongle Info (Mac Only):** The Dongle Sentinel driver installer is no longer automatically installed when you install the editing application. The driver is now located in the Avid\_Utilities folder (/Applications/Utilities/Avid\_Utilities/Sentinel\_Driver). If you have a dongle, manually install the driver from this location.

**When installing the Sentinel Driver, check your System Preferences and select “Security and Privacy.” You may need to choose to Allow the driver to be accessed.**

- NVIDIA drivers are no longer included with the Media Composer installer. You must access the Nvidia website - [Nvidia.com](http://Nvidia.com) to download the applicable driver. See the [Compatibility Chart](#) for tested driver version with this release.
- **NVIDIA Driver:**  
Avid recommends that if you are on a Windows 7 system and working with the Nvidia driver, you should enable desktop composition. See this article for details:  
[http://avid.force.com/pkb/articles/en\\_US/how\\_to/Enable-Desktop-Composition-in-Windows-7](http://avid.force.com/pkb/articles/en_US/how_to/Enable-Desktop-Composition-in-Windows-7)
- MCDEV-11537 If you intend to use full-frame stereoscopic with an Avid Artist DNxIQ, you may want to remain with Media Composer 2018.12 until the issues with stereoscopic support are resolved in a future version.

## Changed in Media Composer v2019.11

The following has changed in Media Composer v2019.11.

### **IMPORTANT: macOS Support**

Media Composer v2019.11 **does not** currently support macOS v10.15 (Catalina).

### **Drawing Shapes and Text with Titler+**

In previous releases, when working with shapes in Avid Titler+, drawing a shape displayed in the middle of the screen. You could then move the shape to the desired location. With this release, you can simply draw the shape at the desired location.

And when creating text with Titler+, simply click and type. There is no need to draw a box first.

### **Additional Support for XAVC HD Intra (CBG) Class Resolutions**

Additional XAVC HD Intra CBG resolutions are supported with this release. The following table lists the XAVC HD Intra CBG Class resolutions.

*Note that XAVC HD Intra CBG Class 200 MXF is not supported for OP1a export or media creation. It is supported for OP-Atom media creation.*

Project Format	Raster Dimension	Frame Rate	Resolutions
1080p	1920 x 1080	<ul style="list-style-type: none"> <li>• 59.94p</li> <li>• 50p</li> <li>• 29.97p</li> <li>• 25p</li> <li>• 23.976p</li> </ul>	<ul style="list-style-type: none"> <li>• XAVC HD Intra CBG Class 100 MXF</li> <li>• XAVC HD Intra CBG Class 200 MXF</li> </ul>
1080p	1440 x 1080	<ul style="list-style-type: none"> <li>• 23.976p</li> </ul>	<ul style="list-style-type: none"> <li>• XAVC HD Intra CBG Class 50 MXF</li> </ul>
720p	1280 x 720	<ul style="list-style-type: none"> <li>• 59.94p</li> <li>• 50p</li> </ul>	<ul style="list-style-type: none"> <li>• XAVC HD Intra CBG Class 100 MXF</li> </ul>
1080i	1920 x 1080	<ul style="list-style-type: none"> <li>• 59.94i</li> <li>• 50i</li> </ul>	<ul style="list-style-type: none"> <li>• XAVC HD Intra CBG Class 100 MXF</li> <li>• XAVC HD Intra CBG Class 200 MXF</li> </ul>
1080i	1440x 1080	<ul style="list-style-type: none"> <li>• 59.94i</li> <li>• 50i</li> </ul>	<ul style="list-style-type: none"> <li>• XAVC HD Intra CBG Class 50 MXF</li> </ul>

## Fixed in Media Composer v2019.11

The following have been fixed:

- **Bug Number:** MCCET-3217. With a high performance HP Z8 system, if you had applied Color LUTs and Color Correction in green/green quality mode, the sequence would drop frames.
- **Bug Number:** MCDEV-11309. (Titler +) Triple-clicking text did not select all of the text.
- **Bug Number:** MCDEV-11963. (Titler +) Word selection bounding box was displayed at the wrong end of the line.
- **Bug Number:** MCCET-3346. You might have received an “Exception: Audio Buffer for TMF Export” error when performing a Send to Playback.
- **Bug Number:** MCCET-3321. When importing an XML with markers, the markers appeared in the Timeline but the Markers window was blank.
- **Bug Number:** MCCET-3343. With a Japanese locale, characters appeared corrupted in the Project format tab of the Settings window.

- **Bug Number:** MCCET-3327. When entering fade values in a Fade Effect, the opacity in the fade would go from 0 to 1 instead of 0 to 100.
- **Bug Number:** MCDEV-12124. Typing in the Effects Palette search field would crash if a Symphony Color Correction relationship effect had been deleted or muted in the Timeline.
- **Bug Number:** MCCET-3192. The Timeline jumped to the blue bar if you clicked one of the segment mode buttons on Timeline Palette.
- **Bug Number:** MCDEV-11970. Reloading frames when opening multiple bins in Frame view was very slow.
- **Bug Number:** MCDEV-11982. If the Motion Effect Editor window was open, pressing the K (pause) key did not stop playback.
- **Bug Number:** MCDEV-11827. The Timeline Video Quality menu reverted to a previous setting when a project was re-opened.
- **Bug Number:** MCDEV-12099. When in Frame View, subclip thumbnails recached every time the bin was opened.
- **Bug Number:** MCDEV-12055. Match Frame selected clips from the wrong track.
- **Bug Number:** MCDEV-11989. The bin did not refresh after a save when Set Bin Display was set to Show Reference Clips.
- **Bug Number:** MCDEV-11998. In some instances, performing Waveform Sync on a sequence resulted in an “AutoGainPane EXCEPTION not handled” error.
- **Bug Number:** MCDEV-10649. Performing Choose Column did not place the newly added column to the right of the selected column.
- **Bug Number:** MCDEV-11048. Creating a new bin or renaming a bin temporarily blanked out Side Bar data.
- **Bug Number:** MCDEV-11772. (Mac) In some instances, Media Composer crashed when turning off Dual-Monitor configuration and switching between workspaces.
- **Bug Number:** MCDEV-11895. In some instances, deleting media files from a bin deleted columns and caused Media Composer to crash.
- **Bug Number:** MCDEV-11906. Long clip and sequence names were cut off.

- **Bug Number:** MCDEV-12000. Changing the default Transition Manipulation icon in Timeline toolbar did not persist between launches.
- **Bug Number:** MCDEV-12002. Transition Manipulation was unexpectedly disabled when clicking in the ruler if the Timeline Settings were set to click the TC Track or Ruler Disables Smart Tools.
- **Bug Number:** MCDEV-12017. The Color picker didn't show the selected bin background color.
- **Bug Number:** MCDEV-11565. The Composer and Timeline windows sometimes used an incorrect font.
- **Bug Number:** MCDEV-11918. Show Bin in Sidebar failed if the bin was in a folder.
- **Bug Number:** MCDEV-12034. Media Composer vaporized when running out of space during render.
- **Bug Number:** MCDEV-12031. (Mac) (Titler +) Grouping was not working with Title +.
- **Bug Number:** MCDEV-12018. (Titler +) Field interpolation was lost when adjusting roll/crawl position.
- **Bug Number:** MCDEV-11945. (Titler +) In some instances, spaces were inserted at the beginning when typing text for a title.
- **Bug Number:** MCDEV-10457. (Titler +) The contents of the title did not change correctly when adjusted using the Global|Foreground Level slider.
- **Bug Number:** MCCET-3198. (Mac). In some instances, dragging items from Interplay Access did not always place the selected items in the bin.
- **Bug Number:** MCCET-3121. You might have received a "PMM insufficient media" error when performing an Audio Punch-In.
- **Bug Number:** MCCET-2618. The HW/SW button might not have detected an attached hardware device.
- **Bug Number:** MCCET-3082. Group clips did not match-frame accurately if the group clip had a different frame rate than the project.
- **Bug Number:** MCCET-3205. In some instances, MXF DV25 420 files could not be imported.

- **Bug Number:** MCCET-3188. When a search was filtered, Media Composer would freeze when editing Timeline Clip Notes in the Timeline Clip Notes window.
- **Bug Number:** MCCET-3203. Audio waveforms were offset on a muted audio clip, if the previous segment on the Timeline had a dissolve effect added that ended on a cut.
- **Bug Number:** MCCET-3057. Group clip names were not in order.
- **Bug Number:** MCCET-3271. You could not adjust 3D warp border and perspective parameters by 1 using arrow keys.
- **Bug Number:** MCCET-3232. Linking BWF files linked as non-drop frame even if drop frame was selected.
- **Bug Number:** MCCET-3240. Media Composer inadvertently allowed you to drag sequences without frame-rate conversion from Interplay into the Source monitor.
- **Bug Number:** MCCET-3185. Effects became unrendered after a sequence was consolidated twice. This fix applies to media consolidated with this release.
- **Bug Number:** MCCET-3141. Media Composer would intermittently hang, vaporise, and display a Breakpad message, when performing the following actions: adding In and Out points, trimming, double clicking on clip from Product Management window (to be loaded on Source Monitor), loading a sequence from the bin, clicking on the Lift button, entering Timeline Fast menu from right click.
- **Bug Number:** MCCET-3173. In some instances the Text View button, Frame View button, search field, thumbnail slider, and scrollbar would disappear from the Source Browser.
- **Bug Number:** MCCET-3182. Sometimes the system would hang when performing Loop Play and then switching workspaces.
- **Bug Number:** MCCET-3076. Color space metadata was not included in QuickTime when AMA linking.
- **Bug Number:** MCCET-3254. You might have received an Exception error after dragging and dropping the Stabilize effect to a segment on the Timeline.
- **Bug Number:** MCCET-3075. Some DPX exported images were distorted/corrupted.
- **Bug Number:** MCCET-3290. You might have received “FatalAbort VDM Scheduling failed” and “MultiFrameCombiner” errors when trimming.

- **Bug Number:** MCCET-3253. Newly created bins using shortcut keys Cmd+N (Mac) or Ctrl+N (Win) could not be renamed easily.

## Limitations

- **Bug Number:** MCDEV12222. A title created in the Title Tool application cannot be promoted to Avid Titler+.
- **Bug Number:** DEFI-1537. (Media Composer | Distributed Processing) You will receive a “No video format descriptor” error when trying to transcode to the following:
  - AVC Long GOP 6 (in 1080i59, 1080i50 projects)
  - AVC Long GOP 12 (both encoding profiles) (in 1080i59, 1080i50 projects)
  - AVC Long GOP 25 (both encoding profiles) (in 1080i59, 1080i50 projects)
  - AVC Long GOP 50 (both encoding profiles) (in 1080i59, 1080i50 projects)
  - AVC Long GOP 35 (in 1080i59, 1080i50 projects)
  - J2K HD (in 1080i59, 1080i50 projects)
  - Apple ProRes Proxy
  - Apple ProRes LT
  - Apple ProRes
  - Apple ProRes HQ

*Apple ProRes resolutions work if the Media Composer | Distributed Processing job was sent from Media Composer Mac to Distributed Processing Mac services, and does not work if sent from Media Composer Mac to Distributed Processing Windows services.*

- **Bug Number:** DEFI-1808. (Media Composer | Distributed Processing) Two clips or sequences will always be created when performing a consolidate or transcode with Media Composer | Distributed Processing.
- **Bug Number:** MCDEV-11481. Promoting a title from the Title Tool application to Avid Titler+ cannot be performed if it includes a motion adapter.
- **Bug Number:** MCCET-11796. Larger than 10 bit DPX files might fail to link correctly.

**Workaround:** Go to File > Settings and click the User tab. In the Link Settings, click the Link Options tab and make sure Alpha Channel is set to Ignore.

- **Bug Number:** MCDEV-11430. Media Tool ignores the “Current project” filtering option and lists media files that are not associated with the current project.
- **Bug Number:** . If you launch a project and receive an “Enable 3rd Party Emulation” warning, even if you select Enable in the warning dialog, you should also perform the following: Select File > Settings and click the Project tab. Click General Settings and select “Enable Bin Sharing on 3rd party storage emulating Avid NEXIS/ISIS.”
- **Bug Number:** MCDEV-11197. In some instances, the Interleave option might not appear in the Export As dialog box. If you are performing an Export using the Avid Media Processor, the Interleave option should appear when you choose Stereo, 5:1, or 7.1 Audio.

**Workaround:** If it does not appear, briefly toggle back to the Mono setting, then toggle to Stereo Mix once again. Doing so should reveal the Interleave option.

- **Bug Number:** MCDEV-8641. (AMD Graphics). Systems with AMD graphics cards might display tearing when performing Full Screen playback.
- **Bug Number:** MCDEV-9460. Windows 7 systems with Nvidia Maxwell or Nvidia Pascal cards might experience playback issues that could result in “Play Consumer timeout” errors.

**Workaround:** Select “Disable GPU Effects” in the Render Settings dialog box.

- **Bug Number:** MCDEV-9269. (Media Composer | Cloud) After performing a remote download operation on a sequence containing AVC-I 100 remote media, the downloaded media appears as XAVC-I 100.

**Workaround:** Download the entire master clips.

- **Bug Number:** (Mac). You may occasionally see the menu bar flash followed by a brief beach ball. To fix this, deactivate “Displays have separate spaces” under System Preferences > Mission Control settings.
- **Bug Number:** MCDEV-9011. Intermittently, when working with the XDCAM Nablet Plug-in, you might see “Failed to get the sample position from the AMA Plug-in” errors if you have waveforms enabled in the Timeline.
- **Bug Number:** COGS-2560. While working in the Script Window, text operations (cut/copy/paste/delete/editing) can only be done in edit mode. See “Editing a Script” in the Help.
- **Bug Number:** MCDEV-5650. When working with Panasonic LongG media, you might receive an “SFPlayConsumer Timeout” error if audio waveforms are enabled.

**Workaround:** Turn off audio waveforms.

- **Bug Number:** MCDEV-5385. MultiCam editing with Panasonic LongG media is not supported with this release.

## Before Installing the Editing Application

### Media Composer | Enterprise and Media Composer | Distributed Processing

If you are working with Media Composer | Enterprise or Media Composer | Distributed Processing, please refer to the “Installation Prerequisites” section in the *Media Composer | Enterprise Administration Guide* and *Media Composer | Distributed Processing Administration Guide* to make sure you have compatible Avid MediaCentral Cloud UX Platform ISO and Avid MediaCentral Cloud UX Feature Pack ISO versions.

### Avid DX Driver Separate Installer

The Avid DX Driver is not automatically installed when you install the editing application. If you need to install the Avid DX Driver to work with your Avid IO device, you can install it separately.

The installer is located:

- (Mac) /Applications/Utilities/Avid Utilities
- (Windows) Program Files\Avid\Utilities\DXDrivers

*For Windows systems, there is a Win7 driver and a Win10 driver in the Utilities folder. The Win7 driver works for both Windows 7 and Windows 8 systems.*

### Before Installing the Editing Application in an Avid Interplay Environment

**Please note the following before you install the editing application in an Avid Interplay or Avid MediaCentral environment.**

Carefully read through the “Avid Editor Compatibility with Interplay Releases” guide (found in the following link) before upgrading. It might be necessary to also upgrade the Interplay components on the editing client.

[http://avid.force.com/pkb/articles/en\\_US/compatibility/Avid-Video-Compatibility-Charts](http://avid.force.com/pkb/articles/en_US/compatibility/Avid-Video-Compatibility-Charts)

### Buffer Error Message

The editing application requires a minimum of 8GB RAM. If you try to install the editing application on a system with less than 8GB RAM, you will receive a buffer error and installation will not proceed.

### **Sentinel Error Message**

(MCDEV-2394) On a Windows 7 system, if a “Failed to add Sentinel64.cat file.” error appears during the installation, you can safely click OK to continue with the installation. Dongle activation will work properly.

### **Download Note**

To avoid “File Path too long” or a “File cannot be copied” warning while unzipping the downloaded installer, try placing the installer .zip on the root level of your C:\ drive and unzip it from that location.

### **User Right to Raise Thread Priority**

(Windows) Note for Domain Administrators: If your editing systems are part of a domain, you must give the user the right to “Increase Scheduling Priority.” This must be done within the Domain Group Policy on the domain controller by giving the right explicitly to the user or giving the right to a group and adding the user to that group. You will not be able to launch as a regular user if this is not set properly.

If you are part of a domain, a Domain Administrator should install and perform the first launch of the editing application.

### **Install as Administrator**

You need to first install and launch the editing application as an Administrator. If you are in a Shared Storage environment, mount your workspaces as an Administrator. You may then log off and log back in as a Standard user, if necessary.

## **After Installing the Editing Application**

### **AMA Plug-Ins**

You cannot install the AMA Plug-ins while the editing application background services are running. Make sure you Stop the services before installing the AMA Plug-Ins. The stop/start background services icon is on the menu bar (Macintosh) or taskbar (Windows). Once you install the new AMA plug-in, restart the services. See “Starting and Stopping Avid Background Services” in the Help.

# Notes on Software Licensing

## If You Upgrade Your Operating System

If you need to upgrade your operating system after you install your Avid editing application, first deactivate your software. After you upgrade your operating system and, if required, reinstall your application, you can reactivate your software. For information on activating and deactivating your software license, see the *Installation Guide for Avid Editing Applications*.

## Minimum RAM Recommendation

For this release Avid recommends 16 GB minimum, 32 GB recommended. Some features might require more RAM and specific hardware. See “[Feature Performance](#)” on page 31 for more info.

## Qualified Hardware and Operating Systems

Some features are processor-intensive and require specific hardware. See “[Feature Performance](#)” on page 31 for more info.

The following tables provide the information on qualified Windows and Macintosh hardware.

For 3rd-Party Open IO hardware qualification refer to the manufacturer’s documentation. See the Open IO Frequently Asked Questions document on the Knowledge Base: [http://avid.force.com/pkb/articles/en\\_US/faq/en422991](http://avid.force.com/pkb/articles/en_US/faq/en422991)

The following lists the qualified Operating Systems. Depending upon your hardware the qualified Operating Systems are:

- Windows v7 64-bit SP1(Professional) and Windows v8.1 (Professional and Enterprise), Windows v10 64-bit v1809 or later (Professional and Enterprise).

*Windows v10 64-bit v1909 is not currently supported.*

- Macintosh v10.12.6, 10.13.6, 10.14.6

*With the release of Mac OS v10.13.x and higher, Apple requires manual approval of loading Kernel Extensions (KEXTs). (For example Avid Nitris DX, BlackMagic, and AJA IO devices install Kernel Extensions.) At installation time, you should get a dialog saying that the KEXT was not loaded. You must go the “Security & Privacy” system preference and manually approve the KEXT. Keep the Security & Privacy pane open after you install the I/O device drivers so that you will see the notice that the driver has been blocked and press the “allow” button within 30 minutes of installing or the driver will be permanently blocked.*

## Qualified Workstations and Laptops

The following tables list the qualified workstations and laptops for Media Composer editing applications.

### Qualified PC Workstations with Avid Media Composer

The following PC Workstations are qualified with Avid Media Composer.

*Avid Artist DNxIV requires a Thunderbolt 2 or 3 card. See [details here](#).*

Qualified PC Hardware	Graphics Card	Supported with
HP Z2 G4 3.0 Ghz or higher six core i7/Xeon E3 Tower or SFF 8 to 64 GB DDR4-2666 memory	Nvidia P620, P1000, P2000 AMD WX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
Dell 3630 3.0 Ghz or higher six core i7/Xeon E3 Tower 8 to 64 GB DDR4-2666 memory	Nvidia P1000, P2000 AMD WX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
Dell 3430 3.0 Ghz or higher six core i7/Xeon E3 SFF 8 to 64 GB DDR4-2666 memory	Nvidia P1000 AMD WX4100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
Dell 3930 3.0 Ghz or higher six core i7/Xeon E3 1U Rack 8 to 64 GB DDR4-2666 memory Thunderbolt adapter not supported	Nvidia P1000, P2000 AMD WX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
Lenovo P330 3.0 Ghz or higher six core i7/Xeon E3 Tower or SFF 8 to 64 GB DDR4-2666 memory	Nvidia P600 P1000 P2000	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP

<b>Qualified PC Hardware</b>	<b>Graphics Card</b>	<b>Supported with</b>
Lenovo P330 Tiny 2.9 Ghz six core i7-8700T 8 to 64 GB DDR4-2666 memory – 1 option slot – TB or discrete graphics	Nvidia P600	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
HP Z2 G4 Mini 3.0 Ghz or higher six core i7/Xeon E3 8 to 32 GB 2666Mhz DDR4 Memory. Performance model only Thunderbolt option.	Nvidia P600, P1000	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
HP Z8 G4 Dual [8 - 24 core 2.1 Ghz or higher] scalable 64-128 GB DDR4-2666 memory, Tower	Nvidia P4000, P5000, P6000  AMD WX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
HP Z6 G4 Dual [8 -24 core 2.1 Ghz or higher] Intel Scalable Processors 64 to 192GB DDR4-2666 memory	Nvidia P4000, P5000, AMDWX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP
HP Z4 G4 6 - 10 core or 18 core 3.3 Ghz or higher processor 32-128 GB DDR4-2666 memory, Tower	Nvidia P2000, P4000  AMD WX5100,WX7100	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP

### Qualified PC Notebooks for Avid Media Composer

The following PC Notebooks are qualified with Avid Media Composer. The following applies to the editing system when running on a laptop:

- DNxHD capture is only supported on Mojo DX on a Quad core system with hyperthreading enabled. Nitris DX is not supported on laptops.
- Capture of 10 bit video for example, DNxHD 185x, is not supported on Mojo DX.

Qualified PC Notebooks	Graphics Cards	Supported With
HP Zbook Studio G5 and Studio X360 G5 2.6 Ghz or higher six core i7/Xeon E3 Ultrabook 8 to 32 GB 2667Mhz DDR4 Memory Dream Color option HP Thunderbolt dock G2	Nvidia P1000	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX

## Qualified Macintosh Notebooks for Media Composer

The following Macintosh notebooks are qualified with the current editing applications. The following applies to the editing system when running on a laptop.

- HD Capture on Macintosh notebooks is not supported
- Playback in full quality 10 bit mode is not supported

Qualified Macintosh Notebook	Graphics Cards	Supported With
MacBook Pro 15" 2.2 Ghz and higher i7/i9 six core Mid 2018 - Touch Bar & Thunderbolt 3	UHD630 AMD Radeon Pro 555X, 560X	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX
MacBook Pro 13" 2.7 Ghz quad core Intel core i7 Mid 2018 - Touch Bar & Thunderbolt 3 8 to 16 GB 2133Mhz LPDDR3 Memory Touch Bar not used by MC	Intel Iris Plus 655	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX
MacBook Pro 15" 2.8 Ghz and higher i7 quad core Mid 2017 - Touch Bar & Thunderbolt 3 16 GB 2133Mhz LPDDR3 Memory Touch Bar not used by MC	HD630 AMD Radeon Pro 555, 560	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX
MacBook Pro 15" 2.6 Ghz and higher i7 quad core Late 2016 - Touch Bar & Thunderbolt 3 16 GB 2133Mhz DDR4 Memory Touch Bar not used by MC	HD530 AMD Radeon 450,455, 460	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX
MacBook Pro 15" 2.2 Ghz and higher i7 quad core Mid 2015 Retina & Thunderbolt 16 GB 1600Mhz DDR3L Memory	HD5000 AMD Radeon M370X	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX

Qualified Macintosh Notebook	Graphics Cards	Supported With
MacBook Pro 15" 2.3 Ghz and higher i7 quad core Retina Late 2013 and Mid 2014 8 or 16 GB 1600Mhz DDR3L Memory	Nvidia GeForce GT 750M & Intel HD5000	Avid Artist DNxIO Avid Artist DNxIQ Avid Artist DNxIV Avid Artist DNxID Avid Artist DNxIP Mojo DX

## Feature Performance

A number of features in this editing application are processor-intensive. As a result, you might experience problems if you are working on an older system. The following chart shows the hardware that Avid has successfully qualified when using these features. For a list of the qualified systems, see [Qualified Workstations and Laptops](#).

Feature	Description	Recommended System
16K projects	64GB RAM minimum	
Editing High Resolution, High Frame Rate XAVC-I Media (UHD/4k in 59.94p) 4 streams of media and color adapters	64 GB RAM minimum, 96 GB recommended	Dell 7920 Dell 7820 <ul style="list-style-type: none"> <li>Dual Xeon Gold 6154 3.0 Ghz, turbo up to 3.7 Ghz 18-core (72 cores with Hyperthreading)</li> <li>AMD WX-7100</li> </ul> Storage: 10Gb Ethernet Avid NEXIS
1080p/50 XAVC Long Baseband Capture	16 GB RAM minimum	Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading

Feature	Description	Recommended System
Editing High Resolution, High Frame Rate DNxHR Media (UHD/4k in 59.94p)	16 GB RAM minimum, 32 GB recommended	<p>HP Z840 HP Z640/Z620 Dell 7920/7910 Dell 7820/7810 Lenovo P910/P900/ Lenovo P710/P700</p> <ul style="list-style-type: none"> <li>NVIDIA P5000, M5000 or K5200 and AMD WX-7100 PCIe Gen3 Gfx card (recommended)</li> </ul> <p>Mac Pro</p> <ul style="list-style-type: none"> <li>12 core (24 with Hyperthreading) 3 GHz</li> <li>Dual AMD FirePro 500/700 Graphics card</li> </ul> <p>Storage: 10Gb Ethernet Avid NEXIS</p>
Editing High Resolution Media (Higher than 2K+)	16 GB RAM minimum	<p>Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading</p>
DMF and Background Transcode, Background Render	32 GB RAM recommended	<p>Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading</p>
Media Composer   Cloud	16GB RAM minimum. 24 GB or higher recommended depending upon system model.	<p>i7 Quad core or higher with Hyperthreading</p>
J2K Capture		<p>Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading</p>
XDCAM Long GOP 9-way MultiCam with high stream count sequences	Avid recommends 16 GB RAM	<p>Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading</p> <p>Storage: 10Gb Ethernet ISIS</p>

<b>Feature</b>	<b>Description</b>	<b>Recommended System</b>
Stereoscopic 3D	For optimal performance with Stereoscopic 3D, use these higher performance systems. Avid recommends a minimum of 12GB RAM when using Stereoscopic 3D.	Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading
XDCAM HD50 Capture	Baseband capture through Nitris DX, Mojo DX	Qualified systems
HD RGB 4444 Apple ProRes 4444 DNxHD 4444	HD RGB capture requires a high end workstation with Nitris DX and fast storage.	Qualified PC Dual 6 Core or higher Qualified Mac Pro 6 core or higher, 12 core with Hyperthreading  Storage: 10Gb Ethernet ISIS
AMA (RED)	AMA is a processor intensive operation. Older platforms may not offer optimum performance. you will get better performance with higher end workstations.	Qualified Xeon Workstations  NOTE: RED plug-in uses the Graphics Processor. Better performance with high performance graphics cards.
AMA (QuickTime)	AMA is a processor intensive operation. Lower end platforms may not offer optimum performance. Highly compressed codecs such as H.264 will exhibit minimal real-time performance.	Recommendation of qualified systems depends on your planned use of this feature. Heavy usage of highly compressed codecs requires the high end systems. (Dual 6 Core or Dual 8 Core systems)
AVCI-Intra Capture	AVC-Intra capture with software codecs is supported.	24 core and higher Windows systems only. Note: If problems are encountered, please use a Nitris DX w/AVC-I capabilities or ingest at another resolution like DNxHD and transcode to AVC I.

Feature	Description	Recommended System
AVCI-Intra	AVC-Intra(AVC-I) is a high quality, low bit-rate HD codec and is very CPU intensive.	<p><b>4-Way MultiCam Playback</b></p> <p>Dual Quad Core, Dual 6 Core or Dual 8 Core Systems</p> <p><b>Four Stream Playback:</b></p> <p>Dual Quad Core, Dual 6 Core or Dual 8 Core Systems</p> <p><b>AMA Workflows:</b> Dual Quad, Dual 6 or Dual 8 core systems</p>

## Avid Artist I/O Device Compatibility

The following table shows the minimum version Media Composer supported with the Avid Artist I/O devices.

You must download the appropriate Avid Artist software from your [Avid Master Account](#).

Device	Minimum supported version Media Composer
Avid Artist   DNxIO	Media Composer v8.4.1 and higher
Avid Artist   DNxIQ	Media Composerv8.8.3 and higher
Avid Artist   DNxIV	Media Composer v8.10 and higher
Avid Artist   DNxIP	Media Composer v2018.8
Avid Artist   DNxID	Media Composer v2018.9

## Compatibility Chart

The following table lists the NVIDIA® driver, QuickTime®, Windows Media™, shared storage, Sony® XDCAM™, Panasonic® P2, and Avid Artist Series versions that were qualified with the Avid editing applications. You can also refer to [Documentation and version matrix](#).

**IMPORTANT: For information on third party support (for example, Sorenson, Boris, etc) see the third party's web site.**

Item	Versions	Comments
QuickTime Support	v7.7.9 (Windows) v10.x, (v7.x legacy) (Macintosh)	Note: QuickTime v10X does not include QuickTime Pro options.  Note: QuickTime is not supported with Windows 10.
Windows Media Version Support	Windows Media Player 12 (for Windows 7)	If you do not have Windows Media Player, access the download at <a href="http://www.microsoft.com">www.microsoft.com</a> .  Windows Media export compatibility is subject to Microsoft Windows Media updates.
Avid Interplay Support	See <a href="#">Knowledge Base article</a> on compatibility.	IMPORTANT: The Avid Interplay components that get installed on the editing application must be updated to the Avid Interplay version that is released with the editing application. These include the Media Indexer, Interplay Access, Interplay Framework, Interplay Transfer Client and ProEncode Client. The Avid Interplay Server components can remain on the previous releases listed as supported. For details, see the “Avid Editing Application Compatibility with Interplay Releases” doc on the Knowledge Base.
NVIDIA Driver Support	v431.02	See “ <a href="#">Setting up the NVIDIA Card</a> ” on <a href="#">page 40</a> . For setting up the driver for stereoscopic, see the NVIDIA setup info in the Stereoscopic 3D Workflow Guide.
Shared Storage Support	Avid NEXIS and Avid ISIS®.	See “ <a href="#">Shared Storage Support</a> ” on <a href="#">page 41</a> .
Sony XDCAM driver	v2.13 (XDCAM Transfer for Macintosh)  Windows FAM v2.3.2 and VFAM v5.0.2	The VFAM firmware version for PDW-U1 is 2.600. The PDW-U2 is 2.810. The driver can be downloaded from Sony's website <a href="http://esupport.sony.com/">http://esupport.sony.com/</a> .

Item	Versions	Comments
Panasonic P2 drive	(Macintosh) v3.1.7 (Windows) v2.24	There is currently no P2 writeback support for Macintosh clients.
Avid Artist Series (Euphonix)	EuControl software v3.4	See the User's Guide for information on Artist Series Color setup information.

## Avid Editing Application Compatibility with Pro Tools

### General Co-Installation Notes:

- Install Pro Tools first and then Media Composer.
- You must uninstall all older versions of Media Composer or Pro Tools before installing newer versions.
- Co-install does not support both applications launched simultaneously.
- When you uninstall Pro Tools, choose to uninstall just the application and not the audio drivers or the editing application no longer sees the devices. On a Macintosh Pro Tools 10 system, this is named the “Safe Uninstall.” On a Macintosh Pro Tools 11 system no uninstallation is required. On a Windows Pro Tools 10 or 11 system, you must select the first uninstall option - “Pro Tools Only” - which is not selected by default.
- Mojo SDI will not be supported with Media Composer or Pro Tools 11, but can still be connected in a co-install configuration for use with Pro Tools 10.
- If you install and configure Avid Mojo DX or Nitris DX hardware on your system, the editing application does not use any connected Pro Tools audio device for audio input/output operations. You can also use these audio devices with a software-only version of your Avid editing application.
- If you run into any issues, uninstall both applications and reinstall Pro Tools first, and then reinstall your editing application.
- Media Composer v5.0 and later and Pro Tools v8.0.3 and later do not include support for the Original Mbox. If you want to use the Original Mbox, you should use Media Composer v4.x and Pro Tools v8.0.1 instead.
- If you want to install your Avid editing application on a system with the Pro Tools Avid Video Engine installed, you must use one of the following configurations:
  - Media Composer v5.5/NewsCutter v9.5 and later with Pro Tools v9.0 or later.
  - Media Composer v5.0.x/NewsCutter v9.0.x with Pro Tools v8.5 or earlier.

# Co-installation Configurations and Audio Device Support

## Avid Pro Tools Applications

<b>Pro Tools Product</b>	<b>MC/NC Software Only</b>	<b>MC/NC with Mojo DX</b>	<b>MC/NC/ with Nitris DX</b>

### Other Avid Audio Devices

<b>Audio Device (Interface)</b>	<b>MC/NC Software Only</b>	<b>MC/NC with Mojo DX</b>	<b>MC/NC/ with Nitris DX</b>
Digi 002 (1394)	Co-install/ Audio Device (Windows)	Co-install	Co-install
Digi 003 (1394)	Co-install	Co-install	Co-install
Eleven Rack (USB)	Not Supported	Not Supported	Not Supported
Fast Track Pro (USB)	Audio Device	Not Supported	Not Supported

## External Controllers

Your Avid editing application supports the following external fader controllers or mixers for automation gain and pan recording or as control surfaces:

- Digi 002 (Windows only)
- Command|8
- Avid Artist Control
- Avid Artist Mix

- Avid Artist Transport
- Avid Artist Color

External controllers or mixers are optional. They are not required for you to perform automation gain or pan recording on an Avid editing system.

The following table compares Avid external controllers and mixers.

<b>Feature</b>	<b>Digi 002 (MC only)</b>	<b>Command  8</b>	<b>Avid Artist Control</b>	<b>Avid Artist Mix</b>	<b>Avid Artist Transport</b>	<b>Avid Artist Color</b>
Control surface for transport controls and other functions	Yes	Yes	Yes	Yes (transport only, no soft keys)	Yes	
Provides audio play, input, and output	Yes	No	No	No	No	
Record automation gain	Yes	Yes	Yes	Yes	No	
Record automation pan	Yes	Yes	Yes	Yes	No	
Flying faders	Yes (8)	Yes (8)	Yes (4)	Yes (8)	No	
Touch-sensitive faders	Yes	Yes	Yes	Yes	No	
Touch-sensitive panners	No	No	Yes	Yes	No	
Solo/mute	Yes	Yes	Yes	Yes	No	
Supports audio mixing	No <sup>a</sup>	No	No	No	No	
Latch mode (also known as Snap mode)	Yes	Yes	Yes	Yes	No	
Number of steps of fader accuracy	1024	1024	1024	1024	Not applicable	

Feature	Digi 002 (MC only)	Command  8	Avid Artist Control	Avid Artist Mix	Avid Artist Transport	Avid Artist Color
---------	-----------------------	---------------	---------------------------	--------------------	--------------------------	----------------------

- a. The Digi 002 can be used as a standalone audio mixer but not at the same time as it is being used as an automation gain or automation pan controller or control surface.

For more information on using these external fader controllers or mixers, see “Recording Automation Gain or Automation Pan Information” in the Help.

## Setting up the NVIDIA Card

To set up the NVIDIA card, you must make sure you have the correct display driver version (install the display driver if necessary, and set the correct display settings. See the “[Compatibility Chart](#)” on page 34 for information on the supported driver(s).

Prior to setting up the NVIDIA card, check to make sure you have the correct display driver version. If you do not have the correct NVIDIA driver, you can install it from the Nvidia website - [Nvidia.com](#).

### To check the NVIDIA display driver version:

1. Right-click the Desktop and select NVIDIA Control Panel. You can also open the Windows Control Panel and double-click the NVIDIA Control Panel icon.
2. Click System Information at the bottom left corner of the NVIDIA Control Panel.

The version number is listed in the Graphics card information section on the ForceWare version line.

### To install the NVIDIA display driver:

1. Download the applicable Nvidia driver from the Nvidia website - [Nvidia.com](#).
2. Double-click the file for the applicable driver.
3. Follow the on-screen instructions, and then restart your system.

### To setup multiple displays:

1. Right-click the Desktop, and select Nvidia Control Panel.
2. In the settings window in the left of the window, click Set up multiple displays.
3. Select or deselect the desired monitors listed.

### **To set the Driver for Avid Editing Environments**

1. Right-click the Desktop, and select Nvidia Control Panel.
2. Click Manage 3D Settings.
3. Click the Global Setting tab.
4. Under Global presets, select Base Profile.
5. Scroll to locate the Power Management Mode. Select Prefer maximum performance.
6. Click Apply.

Reboot after installing the Nvidia software even if you are not prompted to do so.

Never use the Windows “roll back driver” feature on the Nvidia driver. The driver version must match the rest of the components the Nvidia installer installs.

## **Shared Storage Support**

For information on Shared Storage Support, see the Avid NEXIS and Avid ISIS tables in the following document:

[http://resources.avid.com/SupportFiles/Attachments/MediaCentral\\_Compatibility\\_Matrix.pdf](http://resources.avid.com/SupportFiles/Attachments/MediaCentral_Compatibility_Matrix.pdf)
