

# Avid Editing Application

## ReadMe

---

### Revision History

Date	Description
May 15, 2020	Updated <a href="#">Fixed in Media Composer v2019.12.1</a> .

### (Windows) Installing the Editing Application

**IMPORTANT (Windows) Only a patch installer is provided for Media Composer v2019.12.1. You must have v2019.12 already installed. Then use the 2019.12.1 patch to update to v2019.12.1.**

## Documentation Note

The Media Composer editing guide and Media Composer help stated that the maximum number of characters for Tape Names is 32. The actual maximum is 31 characters.

## Fixed in Media Composer v2019.12.1

The following have been fixed:

- **Bug Number:** MCCET-3479. When working with Edit While Capture subclips, the cursor and position indicator did not follow smoothly when scrubbing with the mouse.
- **Bug Number:** MCCET-3354. Fixed support of mixed rate media for fps other than project multiples.
- **Bug Number:** MCCET-3530. Segments were deselected if you switched between red and yellow Segment mode.

- **Bug Number:** MCCET-3577. You might have seen Timeline changes and the audio might not have been correct after performing a batch re-import or relink of the audio.
- **Bug Number:** MCCET-3411. FrameFlex might add a black line to the bottom of the Record monitor when changing Reformat to Pillarbox.
- **Bug Number:** MCCET-3501. A BreakPad window appeared when applying a 3D DVE effect to a Step In video track. The 3D DVE effect appeared by mistake and has been removed.
- **Bug Number:** MCCET-3237. (Windows) FrameFlex scaling might have appeared blurry on some images.
- **Bug Number:** MCCET-3334. You could not transcode if the space required for transcoding exceeded 2097152 MB on 8K projects.
- **Bug Number:** MCCET-3499. In some instances, Frameflex quality was not good when linking a 2048x1152 MOV file.
- **Bug Number:** MCCET-3555. You could not move position (X,Y) in FrameFlex effects editor parameters.
- **Bug Number:** MCCET-3332. AAF exports from Media Composer v2018.12.8 and v2019.9 did not import into Pro Tools.
- **Bug Number:** MCCET-3403. If you had many bins and at least one folder, the Sidebar and Project window bin list scrolled to the top when you closed a bin.
- **Bug Number:** MCCET-3451. The AudioSuite Vari-Fi effect was not working correctly.
- **Bug Number:** MCCET-3442. The AudioSuite Reverse effect was not working correctly.
- **Bug Number:** MCCET-3316. When working with the SubCap effect, the Outline Weight behaved differently in Media Composer v2018.x and above (the space between the letters became larger) compared to Media Composer v8.x. In order to fix this, the Outline Weight includes two options to choose from: Basic Outline and Basic Outline (extra spacing.)

- **Bug Number:** MCCET-3448. You might have received “Assertion failed” errors and audio channels offline when opening a sequence restored from archive.
- **Bug Number:** MCCET-3421. In some instances, the bin would hang or crash when trying to open the bin.
- **Bug Number:** MCCET-3414. In some instances, you might have seen banding issues after rendering or performing video mixdowns.
- **Bug Number:** MCCET-3279. A new setting has been added to Trim Settings. The “Sync Rollers at Position In Filler” puts sync rollers at the blue bar in filler just like non-filler. This makes sure markers in filler will stay in sync with other tracks as they are trimmed. This option is defaulted off.

- **Bug Number:** MCCET-3233. If there was filler between segments, jumping to specific timecode did not work properly.
- **Bug Number:** MCCET-3482. When working with Dynamic Relink, if relink was set to Highest Quality and you do not have access to the drive containing the highest quality media, you received a “cannot find file requested” error message rather than remain linked to the lower resolution media.
- **Bug Number:** MCCET-3115. In some instances, Import and Export Options windows were unresponsive.
- **Bug Number:** MCCET-3069. (NRCS Tool) You might have experienced issues on your first attempt at scrolling down and clicking at the bottom of the Story Panel.
- **Bug Number:** MCCET-3439. If Run Length Encoded (RLE) was enabled in the Import Setting, you might have received errors or a system hang when importing MOV files.
- **Bug Number:** MCCET-3487. Assigned local clip colors changed to default when the volume was adjusted.
- **Bug Number:** MCCET-3461. Audio frames might have been missing after performing a mixed down or an export.

- **Bug Number:** MCCET-3553. The editing application would sometimes crash when switching between bin layouts.
- **Bug Number:** MCCET-3564. When XAVC files were linked when Dynamic Relink was enabled, that Data track displays as Media Offline.
- **Bug Number:** MCCET-3329. With certain keystroke combinations you might have experienced behavior such as slow motion frames or K not stopping playback.
- **Bug Number:** MCCET-3434. There was no audio when linking and importing .mts and .m2ts files on Media Composer v2019.12.
- **Bug Number:** MCCET-3485. Media checked into Interplay as XAVC I CBG Class 100, was checked out in new project as AVC-Intra 100.
- **Bug Number:** MCCET-3455. Dynamic Relink will now properly relink to either XAVC 100 or XAVC HD Intra CBG Class 100.
- **Bug Number:** MCCET-3537. Saving a new workspace with single monitor selected, switches back to dual monitor unless you re-save the workspace.
- **Bug Number:** MCCET-3562. Media Composer crashed to BreakPad during Send To Playback if background check in was enabled.
- **Bug Number:** MCCET-3545. Duplicate shortcut (Ctrl+D) was not working in Script View.
- **Bug Number:** MCCET-3307. When working in the Color Workspace, user interface responsiveness was slower in the Effects Editor window than in the Color Correction window.
- **Bug Number:** MCCET-3227. Media Creation Settings were not retained when added to Site Settings.
- **Bug Number:** MCCET- 3427. In some instances, when performing a Send to Playback, even if the Minimum Resolution warning threshold was enabled in the Transfer Settings, the warning did not appear if the Timeline contained proxy resolutions.
- **Bug Number:** MCCET-3436. Remapped keyboard shortcuts did not work when Bin Container Sidebar was the active window.
