

Avid Editing Application

ReadMe for Media Composer[®] v2021.12.6

Fixed in Media Composer v2021.12.6

The following have been fixed:

- **Bug Number:** MCCET-4507. When switching between working and target settings for Dynamic Relink in the Timeline, the Source Browser window turned black and did not refresh properly until clicked.
- **Bug Number:** MCCET-4770. Mask Margins were visible over the color correction monitors (such as the vectorscope and waveform monitors) in the Composer window.
- **Bug Number:** MCCET-4843. Floating bins changed position and size each time a project was closed and reopened.
- **Bug Number:** MCCET-4850. Opening another sequence while in the Color Correction workspace caused the Edit workspace to load and altered the layout of the original Color Correction workspace.
- **Bug Number:** MCCET-4796. (macOS) Assets in a bin could not be selected after Option + Right-clicking on the Color column and making a selection with the color wheel.
- **Bug Number:** MCCET-4837. (MediaCentral | Production Management) "Managed AMA Media Folders.xml" and "AMA Metadata folders" increased in size, which impacted performance and caused sequences to load more slowly.
- **Bug Number:** MCCET-4892. Highlighted text in a Marker's Comment field turned white and was unreadable after applying a custom highlight color of blue, purple, or yellow.
- **Bug Number:** MCCET-4681. User interface and cursor did not update properly when moving bins, resulting in long wait times and bins that were not moved.

- **Bug Number:** MCCET-4475. In some instances, Media Composer would not relink properly to audio files after partial restore when using Dynamic Relink.
- **Bug Number:** MCCET-4512. "Assertion failed" TimeWarp error caused Production Management check-ins to fail when the Neat Video plug-in was installed.
- **Bug Number:** MCCET-4916. Transfer options disappeared after updating to 2021.12.5.
- **Bug Number:** MCCET-4908. Third-party plug-ins were initialized upon launch. In some instances, this caused Media Composer to hang or crash, or triggered unintentional license usage for third-party plug-ins.
- **Bug Number:** MCCET-4175. In some instances, Arabic fonts did not display properly while using Titler+.
- **Bug Number:** MCCET-4510. (macOS) In some instances, the Titler+ window disappeared when switching between applications.
- **Bug Number:** MCCET-4545. Show Target Availability coloring displayed incorrect availability for partially restored media when using Dynamic Relink.
- **Bug Number:** MCCET-4569. Color Correction panel disappeared when scrubbing in the Timeline with the Color Correction workspace activated and "Clicking the TC Track or Ruler Disables Smart Tools" option enabled in the Edit tab of the Timeline Settings window.
