Avid Editing Application

ReadMe for Media Composer® v2021.12.9

Fixed in Media Composer v2021.12.9

The following have been fixed:

➤ **Bug Number:** MCCET-4880. In some instances, artifacts appeared in the Y Waveform monitor, depending on the Timeline Video Quality Menu settings.

➤ **Bug Number:** MCCET-5057. Exporting and reimporting a "File_129" EDL caused clip names with over 32 characters to be truncated to 32 characters.

➤ **Bug Number:** MCCET-5019. Depending on the type of symbols and the amount of space between them, closed captions generated by Telestream (CaptionMaker) appeared with duplicate symbols if imported as part of an AAF file.

➤ **Bug Number:** MCCET-4533. Importing SCC files created with Subtitle Edit (third-party application) caused some characters to be displayed twice in Media Composer.

➤ **Bug Number:** MCCET-5116. In some instances, H.264 800Kbps Proxy (HD 1080i) media appeared corrupted in the Source monitor if the Video Quality Menu in the Timeline was set to Full Quality (green) or a Timewarp effect was applied when working with mixed frame rates.

➤ **Bug Number:** MCCET-4727. In some instances, H.264 800Kbps Proxy (HD 1080i) media appeared corrupted in the Source monitor if the Video Quality Menu in the Timeline was set to Full Quality (green) or a Timewarp effect was applied when working with mixed frame rates.

➤ **Bug Number:** MCCET-5117. Navigating between markers on a subclip using the "Go to Previous Marker", "Go to Next Marker", "Go to Previous Event", and "Go to Next Event" buttons on the Source monitor caused Media Composer to freeze.

➤ **Bug Number:** MCCET-5104. Panning did not work properly for ganged audio channels in the Audio Mixer.

➤ **Bug Number:** MCCET-4158. When prompted to "Update Sequence" for sequences containing Group clips with Timewarp and color correction effects applied, the duplicated sequence created gaps between clips and changed the overall duration.

➤ **Bug Number:** MCCET-5023. Some bin column data was not displayed properly when used with the Timecode Burn-in effect on Group clips.

➤ **Bug Number:** MCCET-5005. Shift+clicking on markers in the Marker window and performing an operation, such as delete, affected the incorrect markers, if they were filtered using the search field.

➤ **Bug Number:** MCCET-5136. (MediaCentral | Production Management) Sequences took a long time to load if they had associated media on unmounted workspaces.

➤ **Bug Number:** MCCET-4707. (macOS) In some instances, Media Composer experienced intermittent hangs/beachballs on Apple Silicon.
