

Avid Editing Application

ReadMe for Media Composer[®] v2022.12.1

Fixed in Media Composer v2022.12.1

The following have been fixed:

- **Bug Number:** MCCET-4950. SubCap effect did not support Monotype Mosaic font platforms.
- **Bug Number:** MCCET-4948. In some instances, Media Composer would not relink all partially restored audio files when using Dynamic Relink.
- **Bug Number:** MCCET-4760. (MediaCentral | Production Management) In some instances, logging out of Production Management with media status indicators for Resolution enabled (black "dots" in columns within the Production Management Window) caused the application to hang.
- **Bug Number:** MCCET-4521. (MediaCentral | Production Management) The media status indicator in the Production Management Window, represented by a black dot in the corresponding format column, did not display properly when media was online and available.
- **Bug Number:** MCCET-4960. (macOS) Some user interface elements would disappear from the bottom row of the Markers window when the window or its columns were resized.
- **Bug Number:** MCCET-4409. Users were prevented from creating more than 999 bins at the root level of the project folder.
- **Bug Number:** MCCET-4891. Group clips were cropped and stretched in the Source monitor if a gap existed before the clip in a sequence and playback was set to Full Quality (green) or higher.
- **Bug Number:** MCCET-4882. MultiGroup clips with audio waveforms enabled caused Media Composer to crash.

- **Bug Number:** MCCET-4915. When performing a Dynamic Relink operation, audio was offline for clips with audio tracks not starting at A1.
- **Bug Number:** MCCET-4957. Adding a Baselight or Magic Bullet Looks effect to a sequence caused "an unrecoverable error has occurred" or "a serious error has occurred" message to appear when relaunching a project with that same sequence already opened.
- **Bug Number:** MCCET-4958. In some instances, clips that started at 00:00:00:00 would go offline after Media Composer was restarted and Dynamic Relink was enabled.
- **Bug Number:** MCCET-4569. Color Correction panel disappeared when scrubbing in the Timeline with the Color Correction workspace activated and "Clicking the TC Track or Ruler Disables Smart Tools" option enabled in the Edit tab of the Timeline Settings window.
- **Bug Number:** MCCET-4870. Labels were inverted in the surround sound pan controls of the Audio Mixer for tracks panned between the front and rear (f/r) speaker positions. Although the labels were incorrect, pan controls for the Y-axis position of the panner were not affected.
- **Bug Number:** MCCET-4816. Group clips were incorrectly scaled in the Record monitor if a gap existed before the clips in a sequence and the resolution of clips did not match the project settings.
