Avid Editing Application

ReadMe for Media Composer® v2022.12.7

Changed in Media Composer v2022.12.7

(Windows) Before installing this release, you must manually uninstall the currently installed version of Media Composer on your system.

Fixed in Media Composer v2022.12.7

The following have been fixed:

➤ **Bug Number:** MCCET-4215. Opening a clip or sequence containing partially restored MPEG 50 media files caused an "Exception: MXF_DIDMapperSegmented::ReadRange - End Sample Index exceeds on-disk Index Entry Count" error.

➤ **Bug Number:** MCCET-3897. (MediaCentral | Production Management) Using Consolidate/Transcode to convert clips before setting the Video Relink Method to "Highest Quality" in the Dynamic Relink Settings window caused the Data Track to link to the original AMA clip of the Avid OP-Atom media files.

➤ **Bug Number:** MCCET-4806. (MediaCentral | Production Management) Media Composer did not save MultiRez bin columns added with the Bin Column Selection menu.

➤ **Bug Number:** MCCET-5148. (macOS) Enabling or disabling SRT caused a pop-up window asking for the keychain password to recur.

➤ **Bug Number:** MCCET-5334. "<Error encoding string>" was displayed in the Bus Tab Name column for a Pro Tools Session exported from Media Composer and opened on a system set to a Japanese locale.

➤ **Bug Number:** MCCET-5363. (macOS) Media Composer failed to launch after an "Assertion failed" error appeared during the "Initializing Quality Manager" stage of the start-up process on systems running macOS Big Sur with MediaCentral | Production Management 22.3 components.

➤ **Bug Number:** MCCET-5031. Japanese text was not properly decoded in the "AMA Export via Distributed Processing" window on systems set to a Japanese locale.

➤ **Bug Number:** MCCET-5071. In some instances, Match Frame did not work properly if the timeline contained clips that differed from the project frame rate.

➤ **Bug Number:** MCCET-5254. Chinese fonts appeared as "Cannot display name" in the list of available fonts for the SubCap effect.

➤ **Bug Number:** MCCET-4271. Clips were slow to load if EUCON Controller was enabled.

➤ **Bug Number:** MCCET-4281. Source Browser could not link to TARGA (.tga) files and displayed a "Can't be Linked" message in the Plug-in column.

➤ **Bug Number:** MCCET-5329. After applying the 3D Warp effect to a clip, enabling Rotation, and setting its Z-axis to 90 degrees in the Effect Editor, attempting to manually resize the image using the Scale handles in the Composer window caused it to suddenly change size.

➤ **Bug Number:** MCCET-4952. (macOS) In some instances, audio drop outs, distortion and sync errors occurred without effecting video playback on Apple Silicon systems.

➤ **Bug Number:** MCCET-5269. (macOS) Closing the Effect Editor caused the Audio Mixer to change its mix mode from Live to Clip.
